PROJECT OVERVIEW

- C++ based hall management system for smooth operations between students and authority
- Secure data handling with easy menu-driven navigation.
- Students can view hall details, payment status, room info, and complaint status.
- Authority can allocate rooms, update hall info, and manage student records.

KEY FEATURES

User Authentication System

The system provides secure authentication for students, workers and admins - ensuring role based access control.

- Students and workers must change their default password after first login.

Student Features Management

Students can:

- View profile
- View hall dues, room numbers, and other details from the profile
- Update information (email, contact)
- Update password
- File a complaint & view the status
- Log entry/exit

KEY FEATURES

Admin Features management

Admin can:

- Manage students (Add/Remove/Edit/View information, reset to default password, view entry/exit information).
- Manage complaints (pending/in-progress/resolved), and assign a worker to a complaint.
- Manage rooms (add new rooms/allocate students to another room)
- Manage dues (verify payment, add penalty, add hall fees to all students)

Worker Features management

A worker can:

- View Complaints assigned to them, filtered by status.
- Update the status of their assigned complaints.
- Update their own contact number and password.
